

Dear Chairman Powell and Commissioners,

We should require all media using the public air waves for their own profit to provide free time for all candidates who qualify to be on the ballot in the region of specific media companies during the month of October. Perhaps just begin with candidates on the Federal ballot. This simple act would greatly enhance our democracy. And it would serve the general public far better than religious programming and other such things we allow to fill the current requirement of public service in exchange for the use of the public airwaves.

Sincerely, russell Packard
